

How to Set up VPN on iPhone/iPad

1. On the **Home** screen, click **Setting**.

2. Select **General > VPN > Add VPN Configuration...**

3. Configure **L2TP** by following these steps:

- a. Description: The default connection name, e.g. **NIDA_VPN**
- b. Server: **vpnmobile.nida.ac.th**
- c. Account: **abc.xyz@stu** or **@nida**
- d. Password: **user's password**
- e. Secret (or pre-shared key) : **vpn** (use small letter)
- f. Send All Traffic: **ON**

To keep the current settings, click **SAVE**.

4. To connect VPN, go to **General > VPN** and then click **ON**.

(If the connection is successfully completed, the status will be “**Connected.**”)
